ABOUT TEAM

FAC Dev Team occurred by Ahmet TIK, Cavit Eren YILDIZ and Fedai PAÇA to build up Healthy Food Choice Project at 2021 fall semester at Aydın Adnan Menderes University Engineering Faculty.

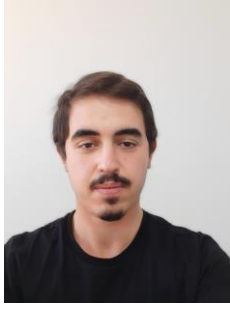

Ahmet TIK as Instructor

About: My name is Ahmet TIK. I was born in Anamur, Mersin on January 11th, 1999. I'm a student at Adnan Menderes University and I'm studying computer engineering. I started my education in Anamur and continued there until University. I started ADU in 2018 at ADU Foreign Languages Department. I completed the English preparatory class one year later and started computer engineering. I am interested in game development in Java at high school. I developed 2 games but none of them were published. I am a self-taught developer who is interested in mostly Java and C++ development. I often try to solve mathematical programming questions.

Cavit Eren YILDIZ

My name is Cavit Eren Yıldız, I'm a student at Adnan Menderes University and I'm studying computer engineering. I started my university education at Muğla Sıtkı Koçman University, and then at the beginning of 2020, I transferred to Adnan Menderes University with a horizontal transfer to the same department.

I completed my foreign language education at Muğla Sıtkı Koçman University with a B+ proficiency certificate and improved myself on programming and data analysis for 4 years. Intermediate knowledge of java and python programming. Knowledge of C is beginner level.

Fedai PAÇA

My name is Fedai PAÇA and I am studying Computer Engineering at Aydın Adnan Menderes University and going to graduate in two years with a bachelor's degree. I am a self taught developer who interests in mostly web design, web apis and generally new web development technology trends. I enjoy and get excited about learning trending topics about software technologies to improve my skill. Even if I was into some .NET and Java environment, I am using Javascript my go to programming language and related software developer tools to solve my daily problems and build up my ideas for the last few years.

TEAM AGREEMENT

Communication

Between group members will be with e-mail. Mailing rules are listed below:

- Mailing will be only with student email address given by each team members: 181805034@stu.adu.edu.tr, 201805001@stu.adu.edu.tr and 211805008@stu.adu.edu.tr.
- From beginning to first meet all members will be edit in cc and all mails will be replied or forward.
- Mails will be replied in 12 hours.

Meetings

Meetings are categorized in 2 ways.

1. **Sprint meetings:** Sprint meetings will be on Wednesdays and on Sundays evenings between 17.00 and 20.00. Exact time of the meeting will be decided according to members

programs. Sprint meetings will be on discord and progress of recent tasks doing by members will be topic of the meetings.

2. **Weekly meetings:** Weekly meetings will be on Friday at between 12.00 and 13.30 at Adnan Menderes University main campus. Exact time of the meeting will be decided according to members programs. Weekly meetings will be face to face and progress of Project in general, sprints of previous week, division of new tasks will be topics of the meetings.

Attendance to meetings listed above are mandatory. Excuses will be applied only if the participants vote for it.

Division of work

Task will be assigned during weekly meetings according to members time density and expertise. Task will be recorded and assigned on projects kanban board related project repository on GitHub. Each task's state will be decided after review of instructor. Task will be submitted and reviewed by instructor Ahmet TIK.

Version control

During the development phase GitHub will be used as version controlling system. Before weekly meeting of development phase versioning rules will be discussed and added on this project plan.

Contingency

Whatever reason if a team member leaves the team others will go on Project and look for a new team member. Three times meeting missing and this honesty will be result of removed from team.
